Alerting Abstract JP A

NOVELTY - The oxygen-absorbent composition absorbs oxygen even under dry conditions.

DESCRIPTION - The oxygen-absorbent composition comprises oxygen absorbent containing linear hydrocarbon polymer which has an unsaturated fatty acid compound and/or an unsaturated group.

USE - For organic electroluminescent element (claimed) used for various displays and industrial machines.

ADVANTAGE - Oxygen-absorbent composition for organic electroluminescent element maintains stable light emission characteristics for a longer period of time, by sealing the oxygen absorbent composition which can carry out oxygen absorption even under absolute dry condition.

Title Terms /Index Terms/Additional Words: OXYGEN; ABSORB; COMPOSITION; ORGANIC; ELECTROLUMINESCENT; ELEMENT; EVEN; DRY; CONDITION
